

The harvard-warwick package

Antigravity QA

2026/07/18 v13.0.0

Abstract

This package provides a BibLaTeX implementation of the Warwick Economics (Harvard) referencing style, based on the 13th Edition of Cite Them Right.

1 Introduction

This package implements the Warwick Economics guidelines for Harvard referencing, based on Cite Them Right 12th/13th Edition. Notably, Warwick requires retaining the Publisher Location for books, which is omitted in standard CTR 13th Ed. Therefore, passing `v12=true` has no effect in this style, as it already conforms to the Warwick requirement. It ensures commas separate blocks, 'et al.' is used correctly, and redundant fields are hidden.

2 Usage

Load the package in your preamble:

```
\usepackage[style=harvard-warwick, backend=biber]{biblatex}
```

3 Examples

3.1 Books and book chapters

For books, use the `@book` entry type. For edited book chapters, use `@incollection`. Ensure that editions use the suffix `edn.` automatically.

3.2 Articles and periodicals

For journal articles, use the `@article` entry type. The format is: Author (Year) 'Title', *Journal Title*, Volume(Issue), pp. x-y. Note the absence of the 'In:' prefix and the strict Volume(Issue) formatting.

3.3 Conference papers

For conference proceedings, use `@inproceedings` or `@proceedings`. The format mirrors edited book chapters, ensuring 'in' is lowercase without a colon.
